

**DEPARTMENT OF THE AIR FORCE  
HEADQUARTERS 341ST MISSILE WING (AFGSC)**

MEMORANDUM FOR 341 MW PERSONNEL

FROM: 341 MW/CC

SUBJECT: Environmental Management System Policy

1. At Malmstrom Air Force Base, protecting the environment is one of our highest priorities and will be a factor in decision making while fulfilling our mission of Airmen employing intercontinental ballistic missiles to compete and win in the 21<sup>st</sup> century. We are dedicated to the continual process improvement to prevent and reduce waste generation and are committed to compliance with environmental laws and other requirements while reducing pollution at the source of generation. We will use an Environmental Management System approach for establishing and reviewing environmental objectives and targets. In all our activities we seek to:

- a. Promote the conservation and sustainable use of natural and manmade materials.
- b. Prevent environmental pollution and waste.
- c. Build environmental information into all levels of management to ensure environmental compliance.
- d. Achieve continual improvement in environmental performance and maintain compliance with all federal, state and local regulations.
- e. Work in partnership with all stakeholders to promote good stewardship of Malmstrom and Montana environmental and natural assets with base personnel, contractors, the community and regulatory agencies.

2. This policy will be made available upon request to the public. The point of contact for this program is Mr. Tony Lucas, (406)731-7794.

ANITA A. FEUGATE OPPERMAN, Colonel, USAF  
Commander
